1-5. (Canceled).

6. (Currently Amended) A computer-implemented method comprising:
creating a template class that stores at least one template parameter,
wherein the template class is a correlation helper template that parameterizes a
particular aspect of a correlation scenario, as recited in claim 5 and wherein the
correlation helper template includes at least one parameter to be defined by a user
initiating the creation of a new instance of the template class;
specifying at least one additional object to be created when an instance of
the template class is created;
initiating the creation of a new instance of the template class using the at
least one template parameter; and

if an error occurs during the creation of the new instance of the template class, receiving a report identifying the error.

7-17. (Canceled).

18. (Currently Amended) A computer-implemented template description structure comprising:

at least one template class that stores a plurality of template parameters, as recited in claim 17 wherein the at least one template class is a correlation helper template that parameterizes a particular aspect of a correlation scenario;

at least one template builder class that identifies at least one additional object to be created with each instance of the template class; and

at least one order parameter that identifies the order in which the template builder classes are instantiated.

19-20. (Canceled).

21. (Original) One or more computer-readable media having stored thereon a template description structure, the template description structure comprising:

at least one template class that parameterizes a particular aspect of a correlation scenario;

at least one template builder class, wherein each instance of the template builder class identifies an object that needs to be created when creating an instance of the template class; and

at least one order parameter that identifies the order in which the template builder classes are instantiated.

22. (Original) One or more computer-readable media as recited in claim 21 wherein each instance of the template builder class has an associated name.
